

# Hormone Replacement Therapy

Hormone Replacement Therapy is a natural addition to our weight loss and wellness clinics. We provide bioidentical hormone replacement therapy for women and testosterone replacement therapy for men.

We are now entering a new era in mainstream medicine that focuses on preventing health problems that are associated with aging. One of the most important preventive therapies in this new paradigm of care is identifying those with hormonal imbalances, and supplementing them with bioidentical hormones to optimal physiologic levels. Whether you have a testosterone deficiency, adrenal fatigue, thyroid issues, estrogen dominance, are suffering with PMS, or are in perimenopause, menopause or andropause, be assured your treatment plan will be based on cutting edge protocols tailored specifically for you.
